#### **FrontStreet Launches UNI-SOLAR® Sales Business**

FrontStreet Partners, LLC has joined with United Solar Ovonic, LLC to assist in obtaining contracts for the sale of its UNI-SOLAR® products using United Solar technology.

Compared to photovoltaic (PV) products that are produced by other technologies, Ovonic™ technology allows UNI-SOLAR® PV products to be flexible, substantially lighter and more rugged. This unique technology allows the PV to be a truly building-integrated product—that is, Ovonic™ PV actually becomes your roof instead of an unsightly array on top of your roof. Furthermore, unlike many thin-film technologies for producing solar cells, UNI-SOLAR® products are environmentally friendly and are produced without cadmium.

FrontStreet's sales business will be spearheaded by members of its Power and IGCC team.
